Ode to the Easel

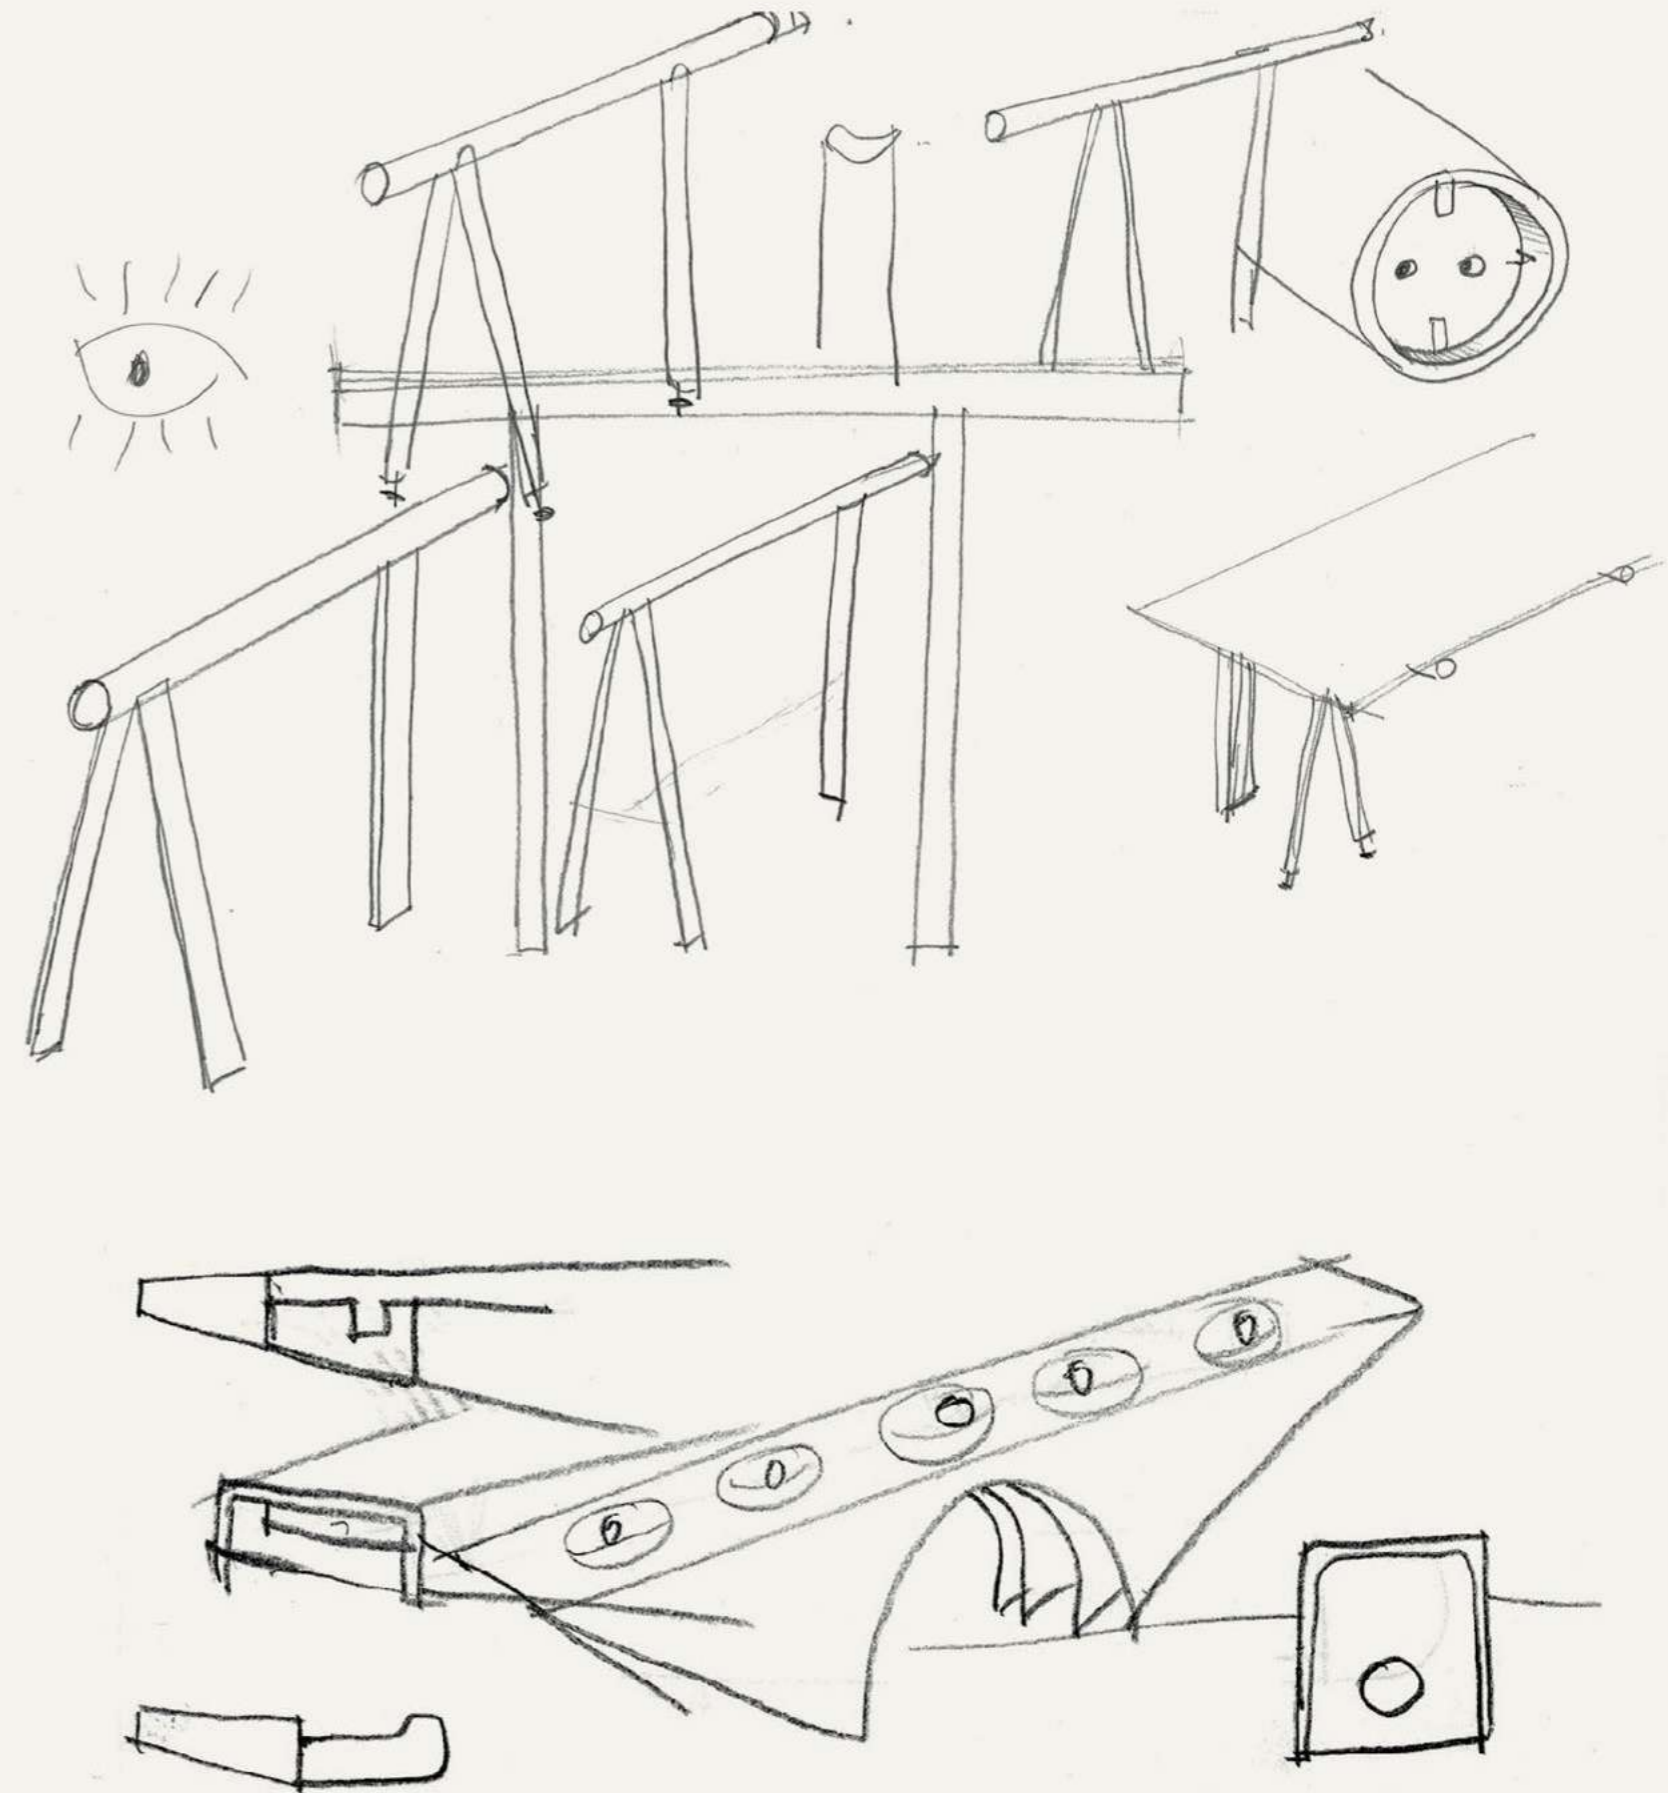

“An easel is an anonymous object, a silent servant that has always helped humans in their activities. It’s an essential tool made of a few elements that work effectively to make an architectural object that supports a surface. Over the years, I’ve seen easels of every shape and material. Wooden easels in carpenters’ workshops, metal easels in joinery workshops, bronze easels in foundries, bamboo easels in Nairobi’s slums, and other types of easels to hold the marble in place in quarries, in artists’ studios, lute-makers’ workshops and architectural firms. A versatile object that gives life to thousands of interpretations while remaining discreet yet functional.”

Francesco Faccin designer

harvey

2021

In 2021, **Francesco Faccin** achieved for Et al. a project that celebrates tradition, but fully meet the needs of working and living today: an electrified three-legs easel which, in pairs, acts as table top support. The easel was named **Harvey** in homage to Harvey Hubbell, inventor of the electric socket. The electrification that runs inside the easel makes it suitable for contemporary work spaces such as coworking rooms and offices, but also for our homes which have been adapted to meet our new needs more than ever before. The electrified solution put into the easel, makes it possible to profit by the whole surface of the table and make use of the furniture flexibly at different times of the day: schuko and USB sockets can charge PC, cameras, telephones, but also a coffee machine or a toaster during lunch break.
