Ari: elegance and versatility for every environment

We are delighted to present Ari, the furniture collection by designer Philippe Nigro. After its success at the Salone del Mobile 2023, where it was presented as a prototype, Ari expands with a **new indoor version** while maintaining the same understated, elegant and versatile aesthetics that has won everyone over in the outdoor sector.

Design and Comfort

Ari is distinguished by its refined interplay of juxtaposed and doubled lines that branch out in height. The frame, made of metal rods that start side by side and in parallel from the floor, folds and separates to create shapes that guarantee maximum comfort. Ari's frame elegantly accommodates the wide, comfortable seat, arm and backrest cushions, offering a superior relaxation experience.

Agility and Functionality

The Ari collection is a complete system including **linear modules, corner modules, end units, armchairs, poufs** and **tables**, allowing you to create customised configurations for your every need. In addition, the Ari family includes the **brand new upholstered outdoor dining armchair**. The stackable armchair has easily removable upholstery that allows for easy storage and adds a touch of style and functionality to outdoor spaces.

Timeless Elegance

Whether furnishing an elegant indoor living room or creating a cosy outdoor space, Ari fits perfectly into any environment thanks to its design and the quality of the materials used. Each element is designed for durability and timeless style, ensuring comfort and refinement in every detail.
